Product datasheet

**ac.KATbridge**

# ac.KATbridge

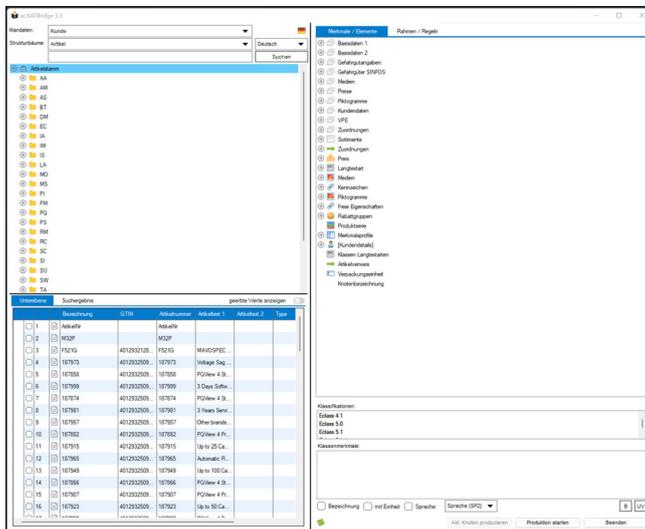

The module for creating automated catalogs, price lists, brochures, flyers, blister cards and data sheets.

## Your product advantages

- User-created layout templates in Adobe® InDesign - Take advantage of all InDesign functionality
- Easy linking of your database contents with the layout templates via drag & drop
- Rule-based templates for controlling the output of even complex layouts
- Easy creation of language variants of your publications
- Subsequent updating of individual data fields in publications that have already been created in just a few steps without the need to recreate the entire publication

## Your benefit

- Automated print production and data sheet creation
- Catalogs and price lists directly from the system
- Produce customer-specific price lists and partial catalogs for a wide variety of markets and target groups in a fully automated process
- Data sheet creation with selected product data from the PIM database fully automated
- Produce catalogs, price lists, brochures, flyers, blister cards and data sheets fully automatically
- Direct integration of the files into the PIM database

ac.KATbridge is the interface between ac.PIM and your layout templates designed in Adobe® InDesign. Your layout templates are designed directly in Adobe® InDesign.

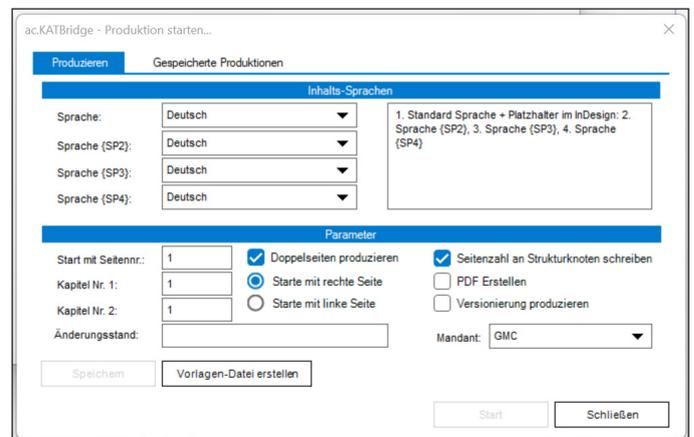

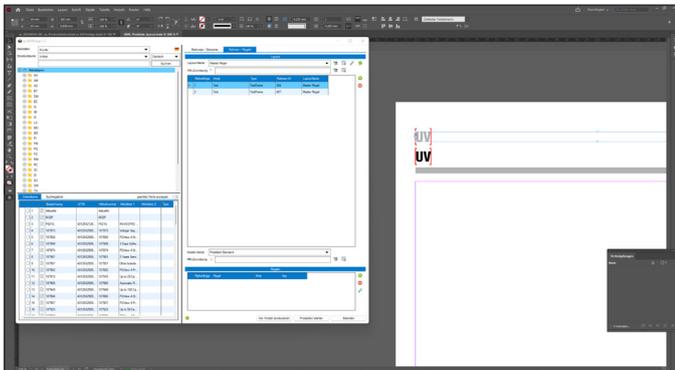

ac.KATbridge

## Function overview ac.KATBridge
