Der PIM-Hersteller vis-à-vis der Industriekultur

INFORMATION SHEET

- **ETIM classification**

Your request:

Would you like to supply your product data to trading partners or customers, e.g., online retailers, wholesalers, associations? - ETIM - BMECat is required.

The most important information in brief:

In addition to the normal BMEcat formats, there is also ETIM BMEcat. This was developed by the organization"ETIM International," which standardizes technical product data worldwide.

- Combination: ETIM BMEcat combines the exchange format (BMEcat 2005) and product classification (ETIM) in a single file.
- Advantage: Suppliers do not have to create two different files, but can transmit product data and classifications together.
- Basis: The structure is based on the rules of ETIM International, which specify exactly which data must be included.

You can find the most important information:

CMT:

- The website with a current overview of the ETIM class model can be found here:

  https://prod.etim-international.com/class

  Please select the desired ETIM version - e.g., ETIM 10

ETIM guide:

The current guidelines for product data provision 5.0 – ETIM BMECat can be found here:

https://etim.de/daten/downloads/

Notes on the guide:

Must: Fields marked with this symbol are mandatory fields in BMEcat.

+Must: Fields marked with this symbol are mandatory fields in ETIM.

Can: optional field to be maintained.

If you have any questions, please contact our sales department.

We remain with kind regards,
